# ABOUT US

Irmak Yapı was established in 2004 with a modern, innovative and visionary approach to steel construction and reinforced concrete field production.

Irmak Yapı is an environmentally sensitive production company with ISO 9001: 2008 standarts, with caring on quality and customer satisfaction, with close to 50 experienced and experienced personnel in its production facility which is built on 3.200 m<sup>2</sup> closed and 1.000 m<sup>2</sup> open area.

Aesthetic and functional solutions in many areas such as industrial buildings, warehouses, bridges, bridges, farms and multi-storey steel constructions, Irmak Yapı is in all stages of the project from design, production and on-site installation. Irmak Structure is always behind services.

As a well-known and preferred brand in the sector, Irmak Yapı is aware that success is due to its world-class, high quality and affordable production, timely delivery of its projects, as well as valuable human resources. For this reason, Irmak Yapı has determined the most important value as a human resource, and employee satisfaction has a high level of customer satisfaction.

Irmak Yapı research and development (R&D), which has been following the technology since the day it was founded, adopts the principle of constantly improving its products and services, renewing itself and pioneering innovations in its sector, continues uninterruptedly and works to perfect its services.

Best Regards,  
Irmak Yapı Sistemleri

**Arif YILAN**

General Manager (Founder)

### OUR HISTORY

#### FOUNDING YEAR

Irmak Yapi was established in 2004 with a modern, innovative and visionary approach to steel construction and reinforced concrete field production.

2004 **01**

#### FIRST INTERNATIONAL PROJECT

In 2010, Irmak Yapi, which has succeeded in the Turkish market up to this date, has stepped into the international market by finishing 2100 Tons of production work in Polimeks Holding's Airport business in Turkmenistan in the best way.

2010 **02**

2013 **03**

2014 **04**

#### FIRST PROJECT

In 2010, Irmak Yapi has successfully delivered the Alkan Group 2013 work, which started with great hopes and excitement in 2013, after busy and dedicated work. (Yıllarla ilgili bir problem var sanırım)

#### NEW FACTORY

Irmak Yapi Which working with more capacity and more employment day by day in its factory, has opened its new factory in 2015 to increase the service quality with its business volume.

## OUR FACTORY

With EN-1090 certificate it's strong logistic infrastructure, environmentally friendly, innovative and high quality service, our factory is built on 3.200 m<sup>2</sup> closed area and 1.000 m<sup>2</sup> of cranes in Kocaeli Dilovası, our factory is completely equipped with new technology products. We are producing reinforced concrete and steel constructions as an institution qualified to receive Factory Place Approval Certificate.

### JOB SECURITY

In Irmak Yapı, work health and work safety are the most sensitive issues. OHS: 18001:2007 Certificate has been obtained with the occupational health and safety management system that it has applied for this purpose. Employees regularly receive training on occupational health and safety, especially in the factory, to ensure that they are treated in accordance with the relevant guidelines. In all areas where Irmak Yapı operates, potential risks are assessed in advance and measures are taken and

### QUALITY MANAGEMENT SYSTEM

Irmak Yapı has been awarded ISO 9001: 2008 Certificate of Approval with its quality management system.

## OUR CERTIFICATES

### ISO 9001:2008

Irmak Yapı has been awarded ISO 9001: 2008 Certificate with its production and implementation of effective quality management system in international standards.

### TS EN 1090-1+A1:2011

Irmak Yapı has been awarded TS EN 1090-1+A1:2011 as result of conformity auditing of steel construction production and structural design.

### OHS 18001:2007

Irmak Yapı has been awarded OHS 18001:2007 Certificate with its work health and work safety management system.

### TS EN ISO 3834-2

Irmak Yapı has been awarded TS EN ISO 3834-2 Certificate since it fulfills the comprehensive quality requirements for the melting welding of the metallic materials it produces.

### TS EN 1090-1+A1:2011

Irmak Yapı has been awarded TS EN 1090-1+A1:2011 as result of conformity auditing of steel construction production and structural design.

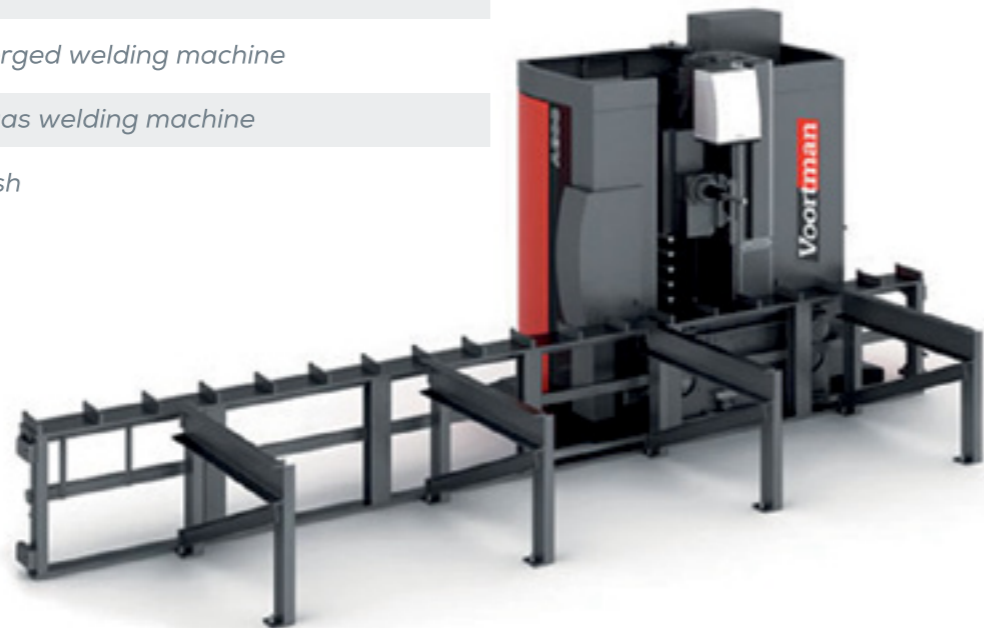

### TS EN ISO 3834-2

Irmak Yapı has been awarded TS EN ISO 3834-2 Certificate since it fulfills the comprehensive quality requirements for the melting welding of the metallic materials it produces.

# SERVICES

## PROJECT PLANNING

We provide services to our valued customers in the production of light steel, rolled steel, reinforced concrete structure, steel bridge and high-rise modern projects with experienced technicians and experienced engineers under the roof of Irmak Yapi Sistemleri.

Please note that the care that will be shown during the projecting phase is the key to a healthy manufacturing and installation in the next stages.

## MANUFACTURING

Material, welding, paint and shipment control are carried out according to ISO 9001: 2008 documented procedures and instructions.

Our materials are manufactured and ready for field assembly by taking the required manufacturing steps and passing through the required stages. We offer services to our customers with the expert staff and machine park that can do manufacturing and assembly in our projects.

Quality material, high quality business understanding and customer satisfaction is our priority.

## ASSEMBLY

Manufactured and dyed Materials are safely shipped to the field. Our trained and experienced assembly teams complete the assembly in accordance with architectural and static projects.

# APPLICATIONS

## INDUSTRIAL STRUCTURE

Irmak Yapi, with its high level engineering skills and innovative understanding, offers a solid, environmentally friendly, fast and easy to produce steel construction solutions for industrial areas.

# APPLICATIONS

## WAREHOUSE

Irmak Yapi, builds steel structures in a short time, that transportable, economically, resistant to external factors such as earthquake, snow and rain in a short time for your steel warehouse and hangar needs.

# APPLICATIONS

## TOWERS

Because of their heights, towers need to be more solid and safe. Irmak Yapı shows you a solution for qualified and earthquake-resist steel structure.

# APPLICATIONS

## BRIDGES

Irmak Yapı offers high-quality, robust, safe, earthquake-resistant and weather-resistant solutions in accordance with world standards in the field of bridge construction with its superior engineering skills.

# APPLICATIONS

## **FARMS**

Irmak Yapi is at your service with the most practical, economical, sound and healthy solutions for your needs such as animals, the storage of crops, the protection of tools.

# APPLICATIONS

## **MULTI-STOREY STEEL CONSTRUCTIONS**

Irmak Yapi's price and performance rate advantage is more prominent in multi-storey structures requiring material, labor and time, and quick deliveries are realized with practical solutions.
